

12 light crystal chandelier

Grosse Pointe, Michigan

In early 2010, after many years of asking a private client finally convinced April to design and create one-of-a-kind lighting for her dining room. The result was a 12 light 2 arm crystal chandelier and 2 matching 5 arm sconces. The chandelier and sconces consist of multiple clear hand-blown glass ribbons, halogen lights, and stainless steel fixtures. The blend of the contemporary lighting in a traditional home was breathtaking. Both functional and beautiful, the chandelier and sconces are the only source of light in the room and provide ample down lighting as well as ambient lighting.

The chandelier measures
60" w x 20" d x 23" h

The sconces measure
30" w x 20" d x 30" h
