

## The Tempest

Detroit, Michigan

In early 2009 a private client commissioned April to conceptualize and create a one-of-a-kind site-specific hand-blown glass wall sculpture for his Detroit loft. April presented the client with 3 concepts based on his various interests, his lifestyle, environment, and budget. The client chose 'The Tempest' concept with copper ruby red colors and a mix of curling and straight shapes. The sculpture is comprised 2 parts that fit seamlessly together. It is mounted to the wall on 2 hand-made stainless steel posts.
